电阻星形联接和三角形联接例题

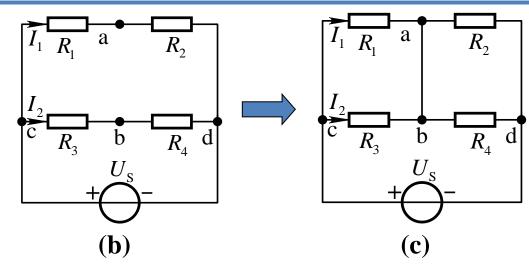

例2图示电路是桥形电阻电路,当 $I_g=0$, $U_{ab}=0$ 时称电桥是平衡的,试说明电桥平衡时的电阻 R_1 , R_2 , R_3 和 R_4 应满足什么关系?

电阻星形联接和三角形联接例题

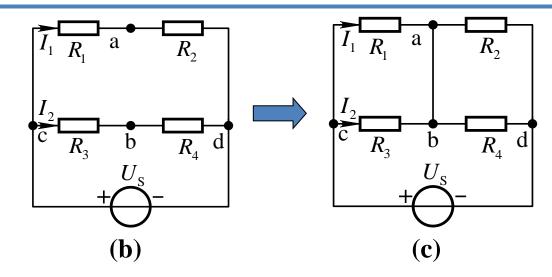

曲图b有
$$I_1 = \frac{U_S}{R_1 + R_2}$$
 $I_2 = \frac{U_S}{R_3 + R_4}$

曲图c有
$$U_{ca} = U_{cb}$$
 即 $R_1I_1 = R_3I_2$

电阻星形联接和三角形联接例题

$$\frac{R_1 U_S}{R_1 + R_2} = \frac{R_3 U_S}{R_3 + R_4} \qquad \text{PD} \quad \frac{R_1}{R_2} = \frac{R_3}{R_4}$$
