叠加定理例题

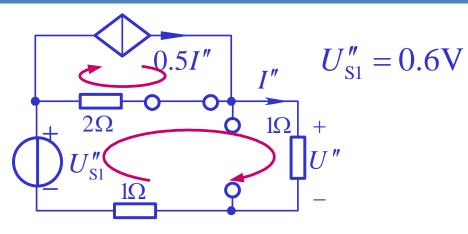

例3 已知当 U_{S1} =3V时,电压U=4V。求当 U_{S1} =3.6V,其它条件不变时电压 U 的值。

$$U'_{S1} = 3V$$
 $U' = 4V$

叠加定理例题

$$(1+2+1)\Omega \times I'' - 2\Omega \times 0.5I'' = 0.6V$$

$$I'' = 0.2A$$

$$U'' = 1\Omega \times I'' = 0.2V$$

$$U = U' + U'' = 4.2V$$
